2017-NOW

UBER

*“A unicorn is just a horse with a **point of view**” - Ron Sexsmith*

*“A Data Scientist is someone who possesses the skill sets to leverage data, delivering **business impact**”*

BUILDING YOUR DATA SCIENCE CAPABILITIES

STEP #1 - HIRING YOUR DATA SCIENTISTS

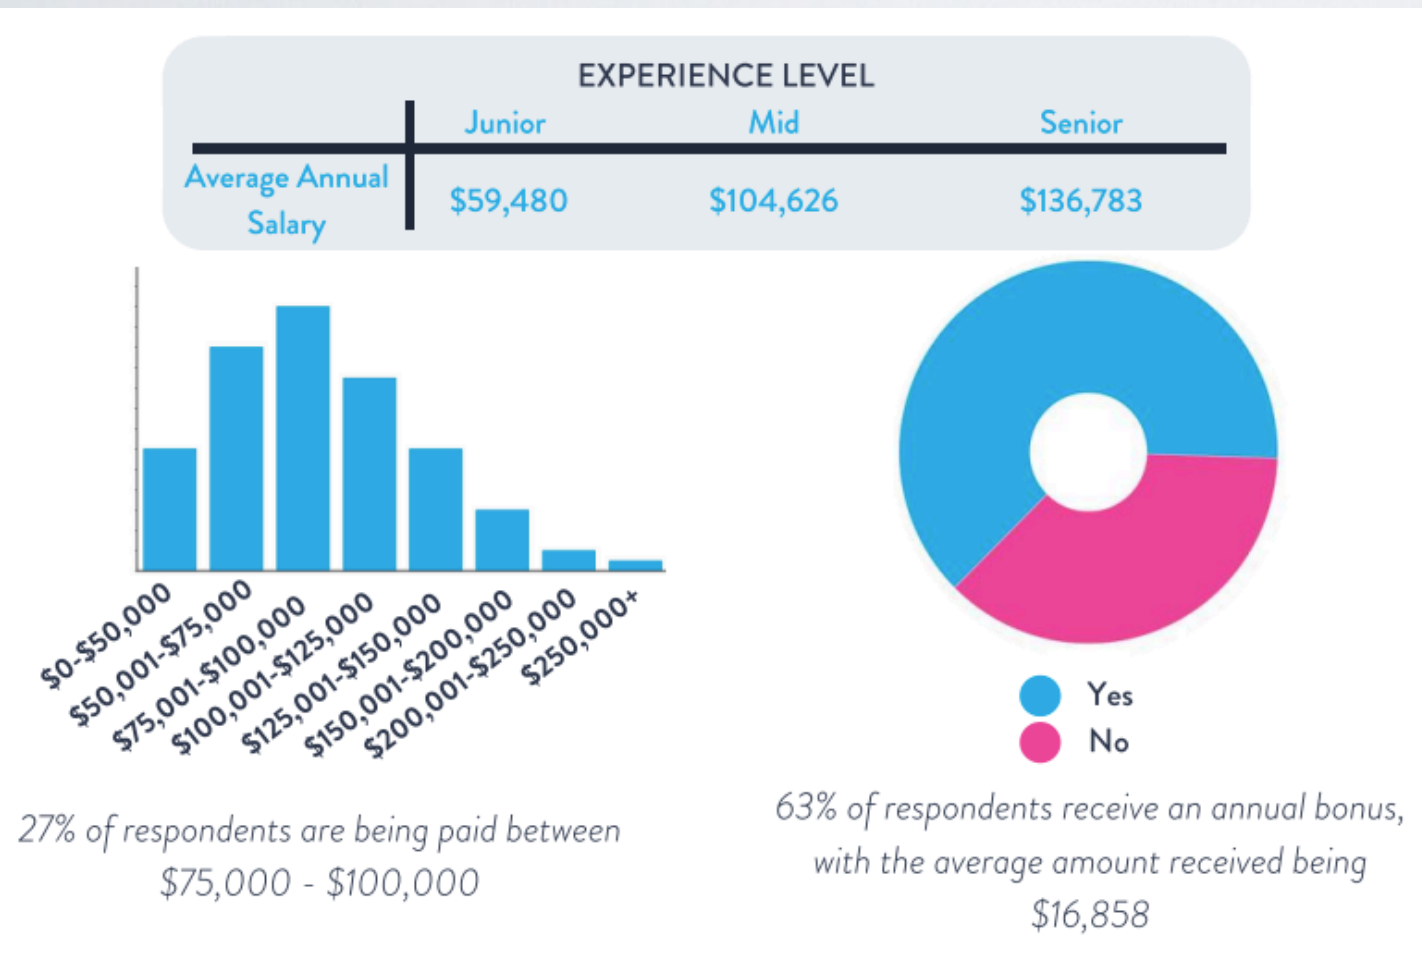

BUILDING YOUR DATA SCIENCE CAPABILITIES

STEP #1  HIRING YOUR DATA SCIENTISTS

BUILDING YOUR DATA SCIENCE CAPABILITIES

STEP #1 - LET'S TAKE A STEP BACK AND TALK NUMBERS

BUILDING YOUR DATA SCIENCE CAPABILITIES

Salary of a data scientist or a data engineer can easily go higher than **\$100k**, or in some cases, over **\$200k** a year

\$100k-500k spend on tools, servers, and licenses a year

BUILDING YOUR DATA SCIENCE CAPABILITIES

*Ballpark figure: **\$1M-2M/year***

BUILDING YOUR DATA SCIENCE CAPABILITIES

QUESTION #1 - DO YOU REALLY NEED DATA
SCIENTISTS?

QUESTION #1 - DO YOU REALLY NEED DATA SCIENTISTS?

*“My data is too big, Excel wouldn’t load
anymore! I need a data scientist!”*

32GB DDR4 RAM = **\$400**

QUESTION #1 - DO YOU REALLY NEED DATA SCIENTISTS?

Sometimes you could hire an external consultant to solve the actual business problem you have

QUESTION #1 - DO YOU REALLY NEED DATA SCIENTISTS?

“So you want to hire me as a Data Scientist for Intelligent Virtualized Deep Machine Learning Real-time Big Data in the Cloud for Social Networks? Ok, but if you also want Hadoop, increase my salary by 50%.”

QUESTION #1 - DO YOU REALLY NEED DATA SCIENTISTS?

SKILLS AND QUALIFICATIONS

- PhD or equivalent experience in machine learning, computer science or
-
-
- logistic regression, gradient boosting, random forests, SVMs, bagging, RNNs, etc.
- hierarchical and multi-label classification models
- NLP, computational linguistics, search
- graph algorithms and/or social network analysis
- programming skills (Java, python or perl)
- as weka, R, scikit-learn or
- Hadoop, Hive, Pig etc.

Do you have a clear project, direction, business impact or do you just need some keywords?

BUILDING YOUR DATA SCIENCE CAPABILITIES

QUESTION #2 - DO YOU HAVE YOUR DATA
INFRASTRUCTURE READY?

QUESTION #2 - DO YOU HAVE YOUR DATA INFRASTRUCTURE READY?

THE REAL DATA SCIENTISTS OF THE ENTERPRISE

WHAT I COULD BE DOING

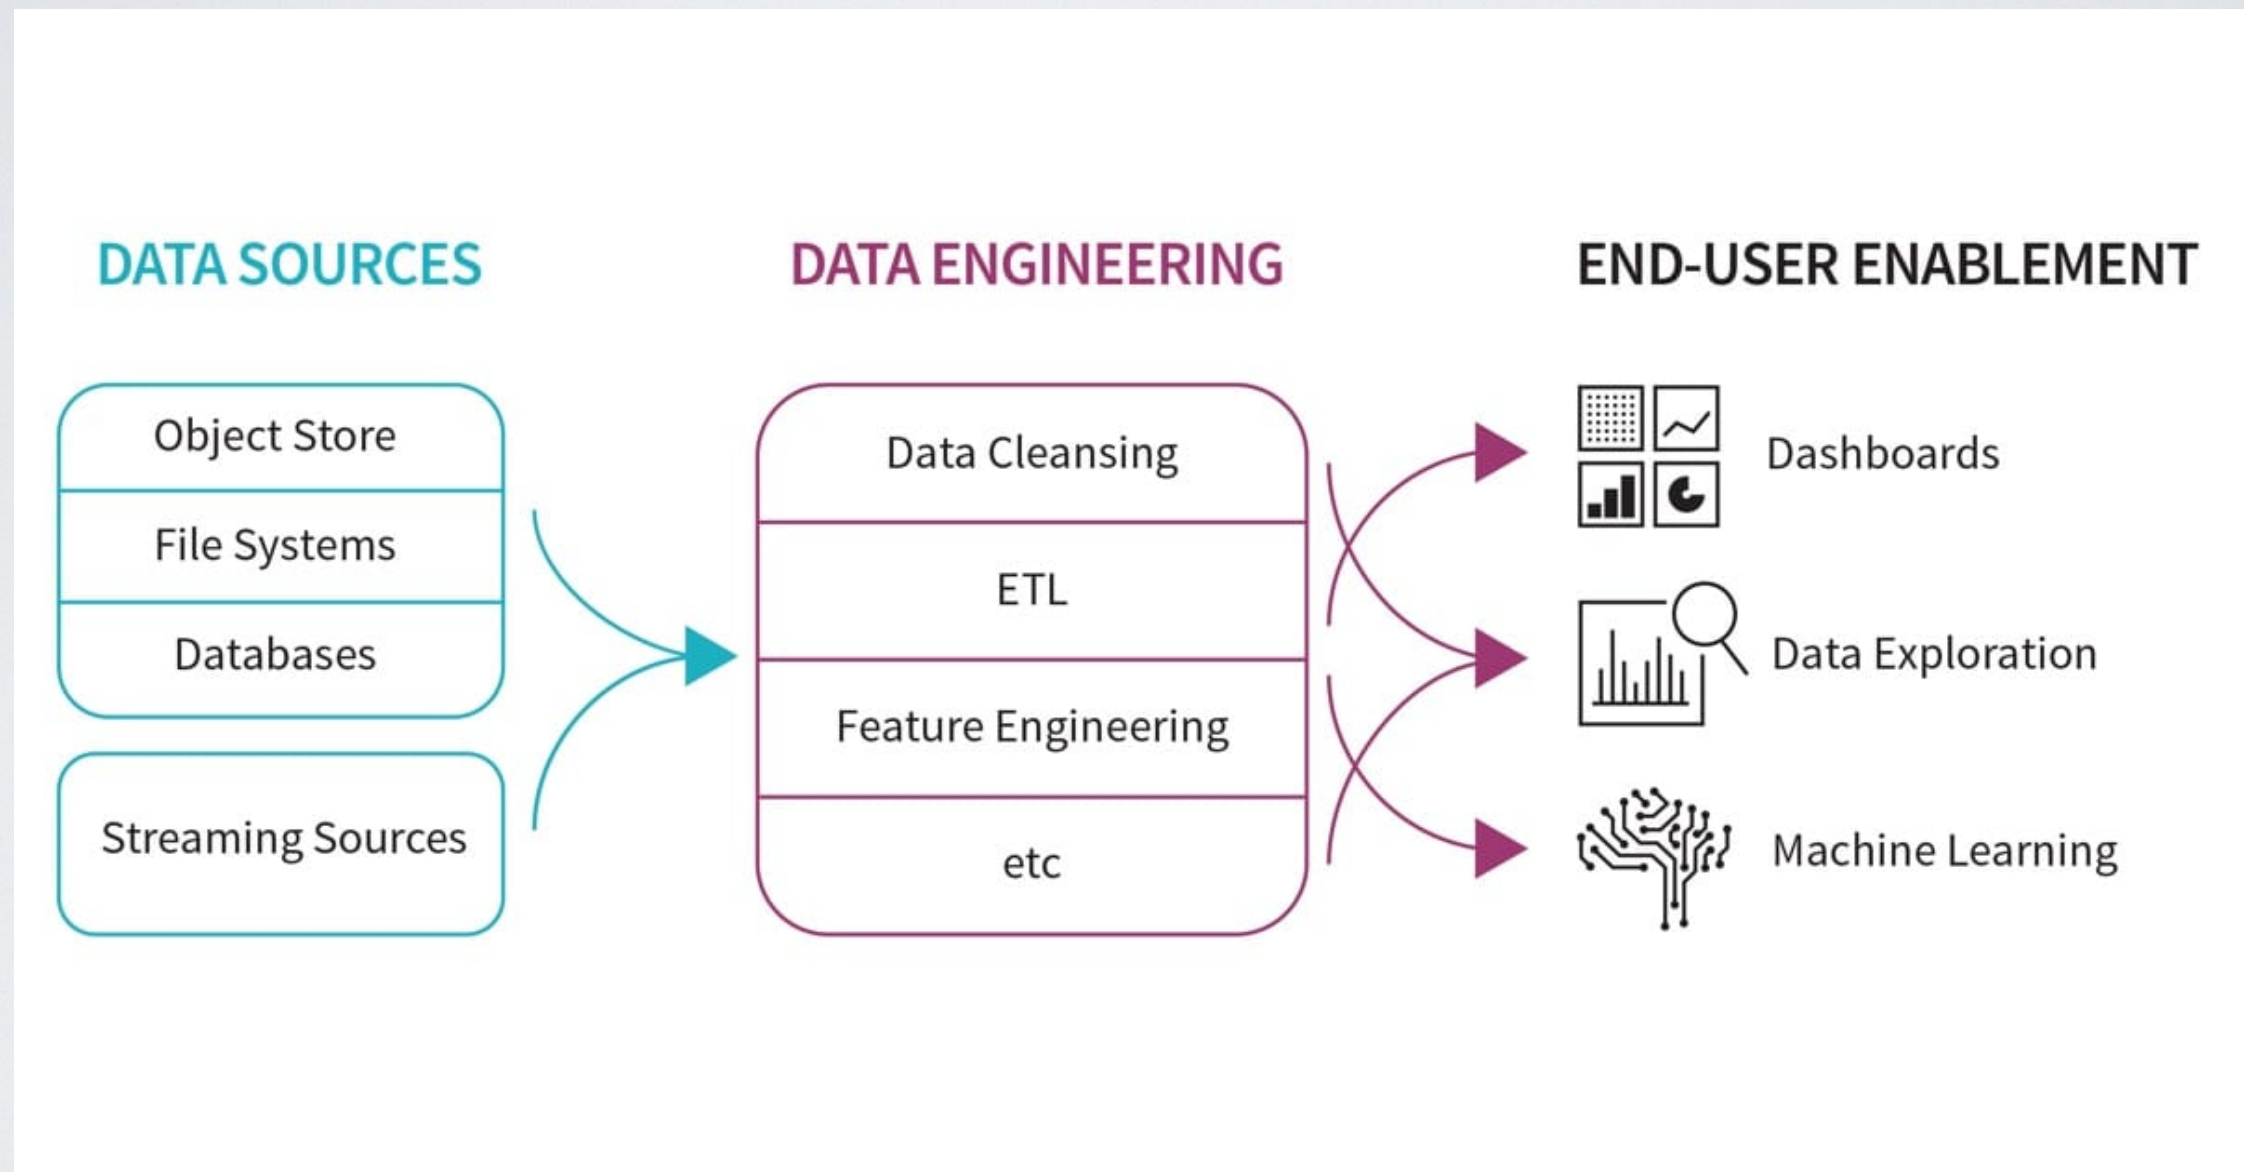

WHAT PEOPLE
THINK I DO

WHAT I ACTUALLY DO

Connect Every Source | Leverage All Data | Liberate Your Ideas

QUESTION #2 - DO YOU HAVE YOUR DATA INFRASTRUCTURE READY?

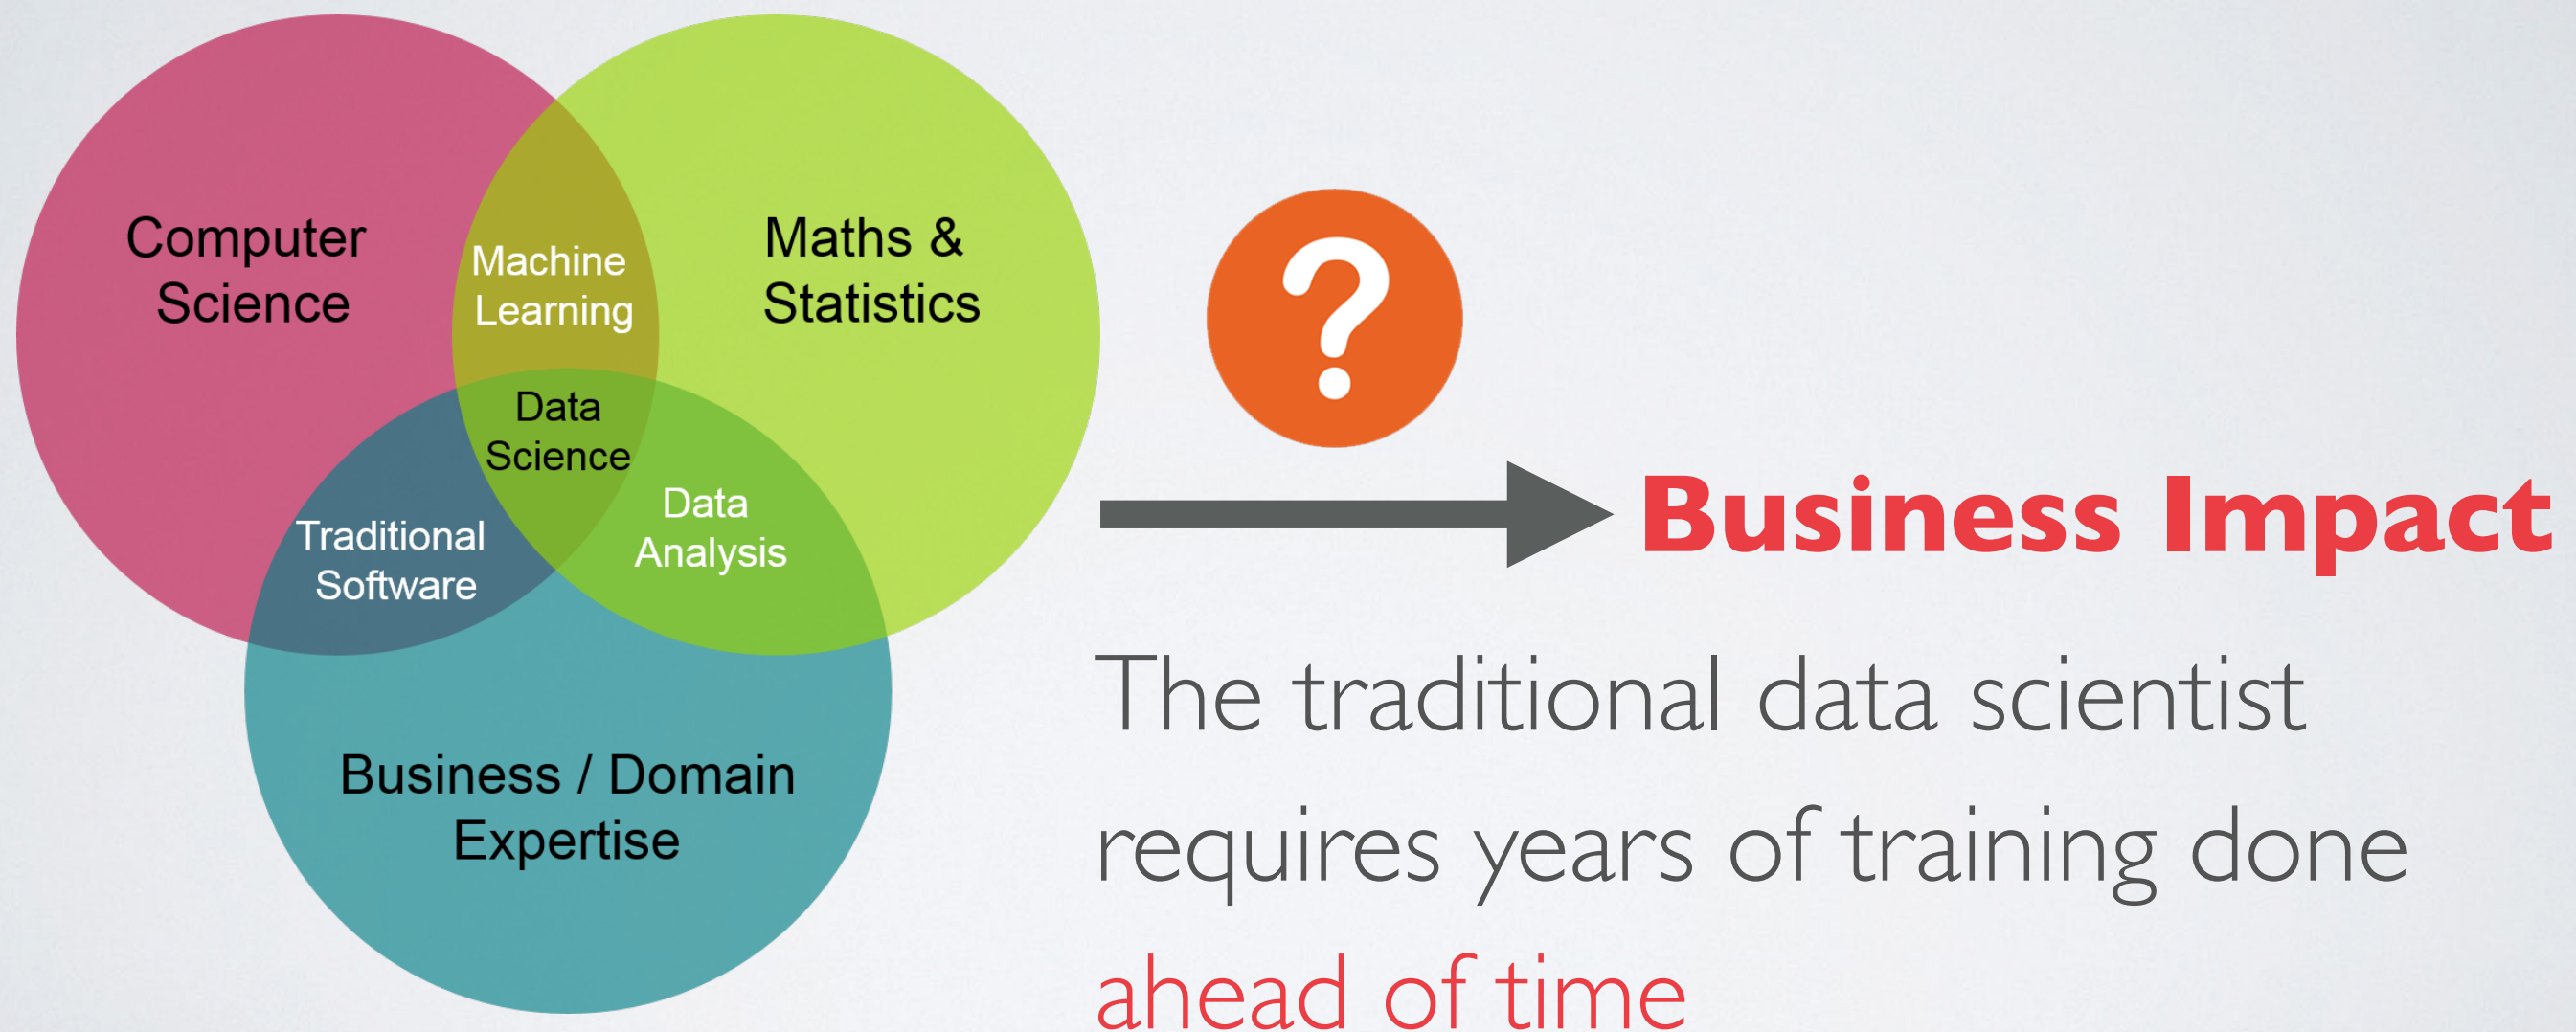

Data Engineers enable Data Scientists to do their jobs more effectively.

BUILDING YOUR DATA SCIENCE CAPABILITIES

HIRING YOUR DATA SCIENTISTS

when there is clearly a shortage of “unicorns”

THE TRADITIONAL APPROACH TO DATA SCIENCE

WHAT CHANGES IN THE LAST FEW YEARS?

**Modern Data
Science toolkits**

Practical and real-world experience + **Modern Data Science toolkits** + *Continuous learning ability*

=

Education can then start with the practical knowledge *at the same time*, or *continue after* one has already made **business impact**

HIRING YOUR DATA SCIENTISTS

Try not to look for people who ticks all the boxes

Focus on demonstration of real business impact and
ability to learn new things

TAKEAWAYS

Your data science capabilities do not start from hiring data scientists

The shortage of unicorn data scientists is real, and how we could emphasize on real-world experience and learning ability instead

THANK YOU!
